ENGINEERING SOLUTIONS

NEED YOUR PV SYSTEM REGISTERED? WE'LL MAKE IT SIMPLE.

Registered professional engineers — we handle PV registration and compliance sign-off with Eskom or your municipality, so you stay legal and worry-free.

Cape Town | Western Cape | Nationwide

THE CHALLENGE

- All PV systems must be registered with your supply authority
- Many systems are **unregistered or non-compliant**. Insurers require registration — **finances may apply**.
- A **CoC alone isn't enough** — most municipalities need **Pr Eng sign-off**. Some Eskom areas may only need a certified electrician. **Contact us to check**.
- Registration lets you apply to feed back to the grid — shortening payback and adding long-term value

WHAT WE OFFER

- ✓ **SSEG application** to your supply authority
- ✓ **System design** documentation
- ✓ **Single Line Diagram (SLD)** and compliant drawings
- ✓ **Site inspection** of the installation
- ✓ **Commissioning report** and final sign-off
- ✓ **Full administration** — paperwork and follow-up handled for you

WHY CHOOSE UNIFIED ENGINEERING SOLUTIONS

- ✓ **Fast turnaround** — new projects actioned immediately
- ✓ **250+ residential registrations** across South Africa
- ✓ **Western Cape expertise** — Cape Town, Stellenbosch, George, Eskom, and more
- ✓ **Fixed, transparent process** (pricing on request)
- ✓ **Regulation-ready** — up to date with NERSA and SANS; we alert installers when rules change
- ✓ **Installer-friendly** — flexible communication that fits how you work

HOW CAN WE HELP YOU?

For homeowners

Solar never registered? Got a notice from your municipality? We inspect, check compliance, and handle the full registration.

For solar installers

Need Pr Eng sign-off or SSEG registration? Partner with us for reliable, efficient compliance support.
